

GLOBAL ORGANIC TEXTILE STANDARD

The aim of these GLOBAL ORGANIC TEXTILE STANDARDS (GOTS) is to define requirements to ensure organic status of textiles, from harvesting of the raw materials, through environmentally and socially responsible manufacturing up to labelling in order to provide a credible assurance to the end consumer.

GLOBAL ORGANIC TEXTILE STANDARDS for organic textiles cover the production, processing, manufacturing, packaging, labelling, exportation, importation and distribution of all natural fibres. The final products may include, but are not limited to fibre products, yarns, fabrics and clothes.

The criteria of GOTS certification is that only natural fibres that are certified organic and fibres from conversion period certified according to recognised international or national standards and certified by any IFOAM accredited or internationally recognised (according to ISO 65) certifier can be used. After that complete processing of organic textile including Ginning and trading must be as per standards of GOTS.

For more details and to obtain a Standard Copy, please contact to OneCert Asia office or mail on info@onecertasia.in

*(OneCert, Inc. is one of the only few certification bodies in the world that is accredited to the **GOTS** standards. OneCert also provides organic certification for production and processing of organic products under the organic programs of the United States, India, and the European Union and is ISO-65 accredited)*
